Playwright Test Report

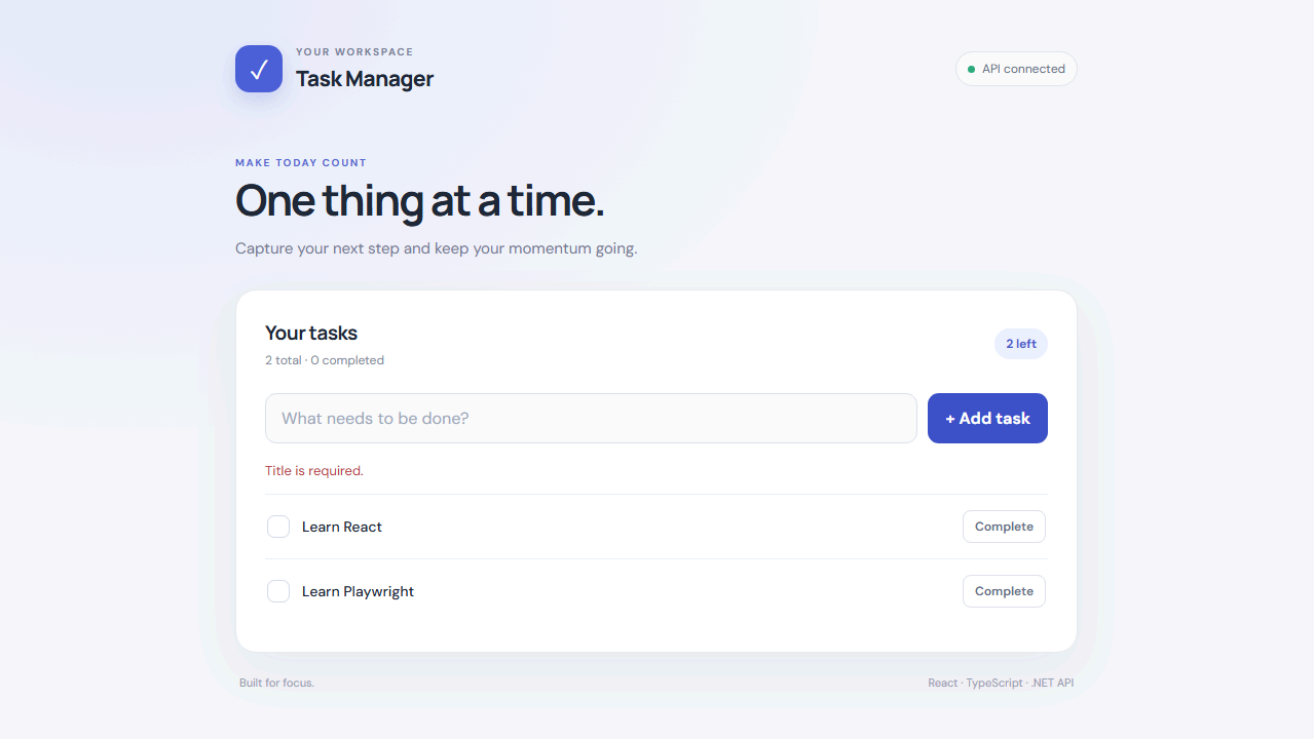

Execution timestamp: 10/30/2026, 1:21:55 PM

Run ID: tasks-api-20261030T132154-repeat
Summary: 2 passed · 0 failed · 0 skipped

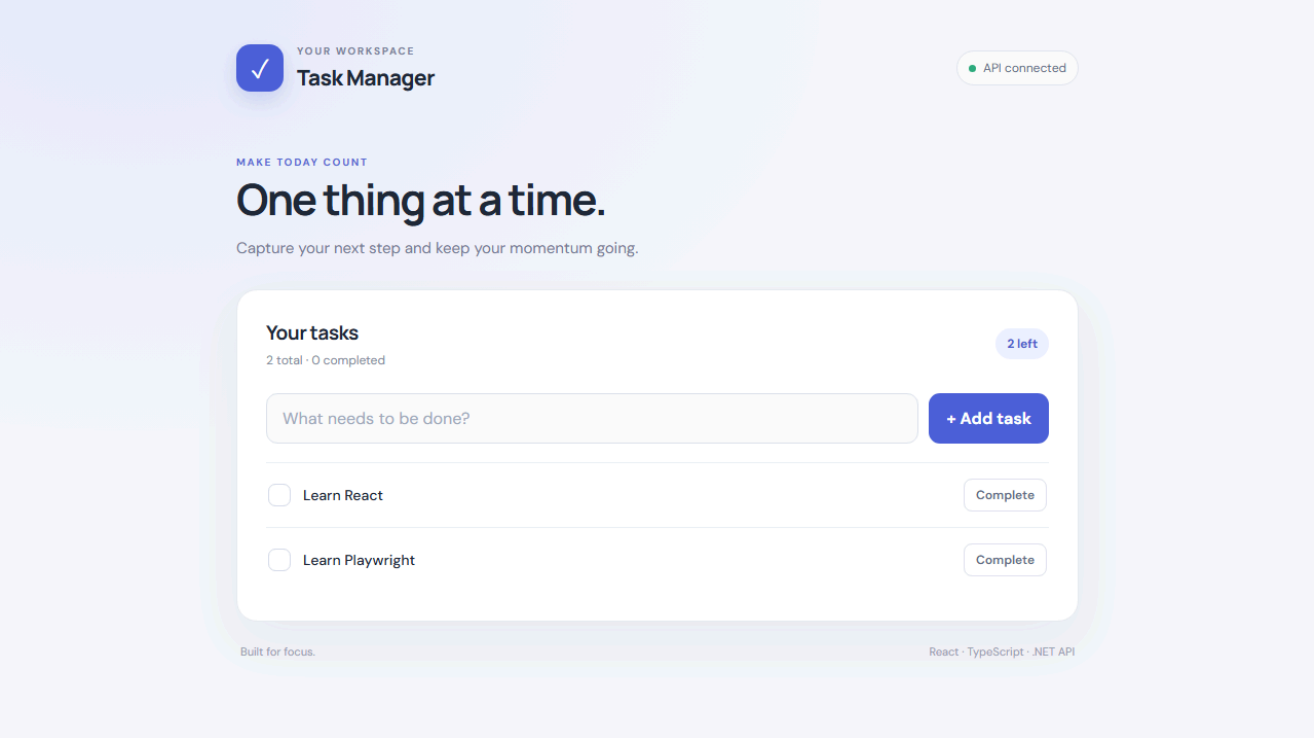

Test results

Test name	Status	Duration
tasks.spec.ts › creates, completes, and reloads tasks	passed	2.67 s
tasks.spec.ts › rejects an empty task title without creating a task	passed	1.70 s

tasks completed

tasks created

Failure details

No test failures were reported in this run.

Defects and unresolved issues

See the detailed bug report below.

Bug report

```
# Observed issue — unresolved favicon 404

## Evidence and scope

Separate headed workflow runs `tasks-api-20261029T1645-headed` and
`tasks-api-20261029T1650-headed-validation` failed their console-error
assertions after observing a real `404 (Not Found)` for
`http://localhost:5174/favicon.ico`. The captured failure context identifies
the single console error as “Failed to load resource: the server responded
with a status of 404 (Not Found).” The task-flow assertions shown in the
failure snapshots had completed; the failing assertion was the check that
the collected console errors were empty.

Supporting evidence:

- `artifacts/20261029/tasks-api-20261029T1645-headed/results.json`,
  `artifacts/20261029/tasks-api-20261029T1645-headed/console.txt`, and
  `artifacts/20261029/tasks-api-20261029T1645-headed/test-output/tasks-creates-
completes-and-reloads-tasks-chromium/error-context.md`
- `artifacts/20261029/tasks-api-20261029T1645-headed/test-output/tasks-creates-
completes-and-reloads-tasks-chromium/trace.zip`
- `artifacts/20261029/tasks-api-20261029T1650-headed-validation/results.json`,
  `artifacts/20261029/tasks-api-20261029T1650-headed-validation/console.txt`, and
  `artifacts/20261029/tasks-api-20261029T1650-headed-validation/test-output/tasks-
rejects-an-empty-task-title-without-creating-a-task-chromium/error-context.md`
- `artifacts/20261029/tasks-api-20261029T1650-headed-validation/test-output/tasks-
rejects-an-empty-task-title-without-creating-a-task-chromium/trace.zip`
- Debug evidence for `tasks-api-20261029T1648-debug`:
  `artifacts/20261029/tasks-api-20261029T1648-debug/debug-console.txt`,
  `artifacts/20261029/tasks-api-20261029T1648-debug/test-output/tasks-creates-
completes-and-reloads-tasks-chromium/error-context.md`,
  and `artifacts/20261029/tasks-api-20261029T1648-debug/test-output/tasks-creates-
completes-and-reloads-tasks-chromium/trace.zip`.
  No independent JSON summary was preserved for this debug run.

## Assessment

The frontend `index.html` has no favicon declaration and the frontend root has
no favicon asset, per the Testing handoff. This supports a suspected minor
frontend static-asset issue; the resource 404 itself is observed, but broader
impact/severity is not established. No fix was made, and no issue is labeled
fixed. The passing complete suite `tasks-api-20261029T1644-run2` remains
separate from these headed/debug diagnostics: 2 passed, 0 failed, 0 skipped.

Separate headed diagnostic outcomes: `tasks-api-20261029T1645-headed` had
0 passed / 1 failed / 0 skipped (9.186 s), and
`tasks-api-20261029T1650-headed-validation` had 0 passed / 1 failed /
0 skipped (2.719 s). The debug workflow `tasks-api-20261029T1648-debug` also
ran and failed on the same assertion; no independent JSON summary was
preserved, so no numeric totals or duration are stated for it.

No controlled defect simulation was performed. Interactive debugger stepping,
live Inspector locator inspection/resume, and screen-sharing of the headed
window were not completed because interactive Inspector control was
unavailable. The actual success/failure traces were opened and their
timeline, snapshots, console, and error panels inspected.
```

```
## Evidence update — 2026-10-29, separate headed diagnostics

The later independent headed full-suite run
`tasks-api-20261029T1703-headed` recorded 0 passed / 2 failed / 0 skipped
(Playwright elapsed 12,037.652 ms). Both tests reached task/validation
assertions and then failed the final no-console-error assertion after
Chromium reported a 404 for `http://localhost:5174/favicon.ico`. Evidence:

- `artifacts/20261029/tasks-api-20261029T1703-headed/results.json`
- `artifacts/20261029/tasks-api-20261029T1703-headed/console.log`
- `artifacts/20261029/tasks-api-20261029T1703-headed/test-output/tasks-creates-
completes-and-reloads-tasks-chromium/error-context.md`
- Traces:
  `artifacts/20261029/tasks-api-20261029T1703-headed/test-output/tasks-creates-
completes-and-reloads-tasks-chromium/trace.zip`
  and
  `artifacts/20261029/tasks-api-20261029T1703-headed/test-output/tasks-rejects-an-
empty-task-title-without-creating-a-task-chromium/trace.zip`

The separate targeted investigation
`tasks-api-20261029T1704-investigate2` recorded 0 passed / 1 failed / 0
skipped (3,890.867 ms) on the same console assertion and favicon URL:

- `artifacts/20261029/tasks-api-20261029T1704-investigate2/results.json`
- `artifacts/20261029/tasks-api-20261029T1704-investigate2/console.log`
- `artifacts/20261029/tasks-api-20261029T1704-investigate2/test-output/tasks-creates-
completes-and-reloads-tasks-chromium/trace.zip`

These are separate diagnostics and are not part of successful complete-suite
run `tasks-api-20261029T1703-run2` (2 passed, 0 failed, 0 skipped). They do
not establish that the issue is fixed. No controlled simulation was
performed. The UI explorer individual and suite actions remained “Did not
run”; live debugger stepping/locator inspection/resume was not completed.

## Evidence update — 2026-10-30, separate headed traced run

The headed diagnostic run `tasks-api-20261030T132256-headed-traced` is
separate from the successful repeat run `tasks-api-20261030T132154-repeat`
reported in `artifacts/20261030/tasks-api-20261030T132154-repeat/test-report.md`.
Playwright recorded 0 passed / 2 failed / 0
skipped (6,717.215 ms). Both tests failed the final `consoleErrors` assertion
after a browser resource 404; the Testing handoff identifies the requested
resource as `http://localhost:5174/favicon.ico` and reports that task-flow and
validation assertions had passed before the final console check.

Supporting evidence for this separate diagnostic:

- `artifacts/20261030/results/tasks-api-20261030T132256-headed-traced.json`
- `artifacts/20261030/console/tasks-api-20261030T132256-headed-traced.log`
- `artifacts/20261030/tasks-api-20261030T132256-headed-traced/test-output/tasks-
creates-completes-and-reloads-tasks-chromium/error-context.md`
- `artifacts/20261030/tasks-api-20261030T132256-headed-traced/test-output/tasks-
creates-completes-and-reloads-tasks-chromium/trace.zip`
- `artifacts/20261030/tasks-api-20261030T132256-headed-traced/test-output/tasks-
rejects-an-empty-task-title-without-creating-a-task-chromium/error-context.md`
- `artifacts/20261030/tasks-api-20261030T132256-headed-traced/test-output/tasks-
rejects-an-empty-task-title-without-creating-a-task-chromium/trace.zip`

This is an observed console/resource issue in that distinct run, not a failure
of the selected successful repeat run. No fix or post-fix verification is
claimed.
```
